Alarming Decline in Cybersecurity Job Postings in the US

A new study by CyberSN warns that the overall number of cybersecurity job postings in the US decreased by 22% from 2022 to 2023.

The cyber job platform provider added that this decline is alarming and could impact national security, as some of these roles are essential for maintaining organizational and national cyber defenses.

The most significant decline is in research roles, which saw a general 69% drop year-on-year between 2022 and 2023.

According to CyberSN, this suggests a move away from proactive threat analysis and mitigation. Job postings for engineer roles have also significantly decreased, with the most posted role in the cybersecurity field, security engineer, experiencing a 21% drop.

“[This] represents a direct threat to our national cybersecurity infrastructure. These roles are vital for developing secure products and integrating security throughout the development process, and their reduction is alarming,” Deidre Diamond, founder and CEO of CyberSN.

NYDFS 500

NYDFS Cybersecurity Regulations Update

Overview of DFS Business Categories:

Small (“Exempt”) Companies Must meet one of three criteria

- Under 20 employees (including affiliates and contractors) **OR**
- Under 7.5 million in gross annual revenue **OR**
- Year end assets (including Affiliates) total less than 15 million

Non- Class A, Non- Exempt (“Standard”) Companies

- Majority of DFS regulated entities

Large “Class A” Companies

- 2,000 employees
- 1 billion in gross annual revenue

Important Deadlines you Need to Know About:

April 15, 2024

Submit either a Certification of Compliance **or** an Acknowledgment of Non-Compliance for the 2023 calendar year.

April 29, 2024

Risk Assessments continued to be required and now must be reviewed and updated annually.

April 29, 2024

Annual Penetration testing required along with independent design and conduct of current cybersecurity audits.

Nov 1, 2024

Annual Cybersecurity training for personnel required to now include social engineering.

No matter what your company size or exemption status LACyber has solutions to help you comply!

Get Started Now

Is your company affected by the New York State Department of Financial Services (NYDFS) Part 500 Cybersecurity Regulation?

TAKE THE FIRST STEP TODAY

START WITH A CISSP

A Board Certified CISSP is more than just a cybersecurity expert. They are the guardians at the forefront of protecting your business from digital threats.

Here's why consulting a CISSP is your best first step:

- **Compliance Assurance:** Stay ahead of regulations and ensure your business meets all cybersecurity legal requirements.
- **Tailored Strategies:** Your business is unique, and so are its security needs. A CISSP can craft a plan specific to your situation.
- **Proactive Protection:** CISSPs don't just solve existing problems; they anticipate and prevent future threats.
- **Unmatched Expertise:** CISSPs are rigorously trained and tested in all areas of information security.
- **Peace of Mind:** Knowing an expert is safeguarding your data lets you focus on what you do best - running your business.

Meghan Schultz

How long have you worked at Lincoln Archives?

- A little over two years!

What's your role with Lincoln Archives?

- I'm the Inside Sales Coordinator

What do you like to do in your spare time?

- I like to spend time with my two kids and my husband. We enjoy going to the beach, the Drive In when the weather is warm, and all of their sporting activities.

What's your favorite part about working at Lincoln Archives?

- Coming into work every day and laughing with the wonderful ladies (and Kevin) in the office.
