EP 137: PREDATOR

mercenary

(INTRO):   [INTRO MUSIC] These are true stories from the dark side of the internet. I'm Jack Rhysider. This is Darknet Diaries. [INTRO MUSIC ENDS]

(INTRO) JACK: Spyware merchants love the idea that they are just like, all these terror plots and bad actors — and the only thing you can do is Kiefer Sutherland it and just hack them immediately, right? Forget the law; we need to get the bad guys. But the thing is we know from recent and older history that if governments start being enabled to do that, bad things inevitably follow. Temptation to abuse it always follows. Some of the biggest problems that we have today in the United States around privacy come from the post-September 11th period, things like the Patriot Act, right? Hugely invasive stuff. But then the other question — and this is equally important — is does the society, does the governmental office that's receiving this data have the mechanisms in place to prevent abuse if the people who happen to be holding this stuff in their hands are not good people or could be giving in to the wrong temptations?
      Lighthouse Reports is an investigative non-profit working with some of the world's leading media companies on topics like migration and surveillance.

Data Destruction

- Loose HD's & SSD's
- PC's, Laptops
- Monitors
- iPhones/ iPads
- Backup Tapes, CD's, DVD's
- Server Racks, Switches, USB's,
- Keyboards, Mice, Printers, Faxes, Phones and More!

Do you have hard drives and other electronic devices you need to have destroyed with documented proof of destruction?

LACyber will pick up your PCs, laptops, servers, routers, and phones in the Buffalo/WNY area, shred the hard drive or solid-state drive and issue a certificate of destruction for your records.

We are the only NAID certified company (National Association of Information Destruction) that is locally owned and operating in WNY.

Comprehensive Data Security Services

Be Compliant.
Reduce Risk.
Protect Your Business

Data Breach Support

Do you know what to do if you have a data breach? Most businesses don't. uRISQ's Data Breach Support gives you the peace of mind that a Certified Privacy Expert (CIPP) is at the tips of your fingers.

Privacy Policy Assessment

Managing risk is an important aspect of all successful businesses. Developing and maintaining a security and privacy program is key to managing your organization's risk of data loss. Privacy Assessment helps you with your annual assessments, and policy and plan templates for your organization.

Threat Scanning

uRISQ's Threat Scanning performs a recurring vulnerability scan on your website and firewall, making you aware of your open vulnerabilities.

Data Subject Access Request Process

Data Subject Access Request is a request initiated by the individual or a legal representative requesting the specific information you as a company collect, store, and transmit on an individual. uRISQ's DSAR module is a workflow management tool that helps organizations manage their requests from beginning to end and make sure they adhere to the legal time requirements.

Vendor Management

Every business relies on third-party vendors to perform some aspect of its operations. It is a requirement that you ensure those vendors are handling the information you have entrusted to them to the same privacy and security standards you are publishing in your privacy policy.
